FINAL WETLAND ASSESSMENT REPORT

Please find attached the final Wetlands Assessment Report and Map for the Rocky Flats Plantsite prepared by Advanced Sciences, Inc. The assessment reports that approximately 107 acres and 84,970 linear feet (primarily along drainages) of wetlands are located within the boundaries of the plant and approximately 156 acres and 14,190 linear feet of wetlands are located outside (generally east) of the plant boundaries, with 140 acres being attributed to Great Western Reservoir. The map has been reviewed by Mr. Terry McKee of the U. S. Army Corps of Engineers.

This document will serve as a reference source for future NEPA documentation. For example, the report was given to the consultants assembling the EIS for the RMP project. The report will also be used to evaluate whether potential sites for future construction projects will impact jurisdictional wetlands. Such evaluations may lead to relocating a site to avoid impacts on a wetland.

Please contact Scott McGlochlin on extension 5909 if you have questions or need additional information regarding this document
